

KALMESH C SAUNSHI

Full Stack Web Developer

+91 8139947585 • kalmeshsaunshi2003@gmail.com • **G I T H U B** • Hubli, India

Summary

Motivated and detail-oriented **Full Stack Web Developer** with a strong foundation in **Python, React.js**, and **Oracle SQL**. Skilled in building responsive web applications using modern **web technologies**, REST APIs, and user-centric design principles. Passionate about learning, problem-solving, and contributing to real-world projects. A quick learner with strong communication skills and the ability to work effectively in collaborative team environments.

Experience

Smart India Hackathon 2024 - Winning Project

Frontend Developer

09/2024 - 12/2024

Developed a winning project during the Smart India Hackathon.

- Designed and developed an intuitive and responsive UI for the platform.
- Tested implemented functionalities to ensure they worked correctly and met project requirements.

Vijesha IT Services

Web Development Intern

Hubli

10/2024 - 01/2025

Internship focused on web development projects.

- Developed dynamic websites for client projects using React.js & Node.js.
- Enhanced website functionality with database integration (MySQL & MongoDB).

Education

Jain College of Engineering & Technology

Bachelor of Engineering

Hubli

12/2021 - 05/2025

Key Achievements

Winner, Smart India Hackathon 2024-Certificate

Developed a winning project in the Smart India Hackathon with a responsive UI and tested features to ensure smooth functionality and user experience.

NPTEL Certified in Data Structures & Algorithms in Java- Certificate

Achieved NPTEL certification, demonstrating a solid understanding of data structures and algorithms while enhancing my programming skills.

Skills

- **Frontend:** HTML, CSS, Tailwind CSS, JavaScript, React.js
- **Backend:** Python
- **Database:** Oracle SQL, MongoDB
- **Version Control & Tools:** Git, GitHub, Postman, REST API Intigration
- **Foundations:** Data Structures and Algorithms, Web Technologies,
- **Others:** AI/ML, OpenCV (basics), Responsive UI Design,

Projects

Carbon Neutrality Application

09/2024 – 12/2024

A winning project from the Smart India Hackathon focused on carbon neutrality.

- Developed an AI-driven platform to quantify carbon emissions in coal mines and suggest reduction pathways.
- Designed and implemented the frontend using React.js & Tailwind CSS.

Disaster Detection System

02/2025-05/2025

A deep-learning-based web application for detecting and mitigating natural disasters like **deforestation, landslides, and floods**.

- Developed using **Python (backend)**, **MongoDB**, and **React.js (frontend)** to analyze uploaded images and detect disasters with prediction accuracy.
- Displayed disaster type, confidence score, **mitigation suggestions**, and a **masked image output** highlighting affected area
