

SHAHRUKH KARIM

Senior Java Full Stack Developer

Dynamic and results-driven Senior Java Full Stack Developer with a focus on delivering innovative software solutions in the IT industry. Aiming to leverage extensive technical expertise in full-stack development to contribute to organizational growth and enhance personal knowledge of emerging technologies.

PROFILE SUMMARY

- **Accumulated over 7 years of comprehensive experience in the IT sector, specializing in software development** with a strong emphasis on full-stack Java technologies, contributing to various high-impact projects across multiple industries.
- **Currently serving as a Senior Software Engineer at Quest Global, leading the development of sophisticated software applications** while ensuring adherence to best practices and high-quality standards in coding and design.
- **Versatile Full Stack Developer with extensive experience in designing, developing, and deploying scalable web applications**, proficient in both front-end and back-end technologies to deliver end-to-end solutions.
- **Strong command of front-end frameworks (React) and back-end technologies (Node.js, Java)**, with expertise in RESTful APIs, microservices, and cloud platforms like AWS and Azure.
- **Proven ability to collaborate with cross-functional teams, delivering high-quality software solutions** within agile environments, consistently meeting deadlines and exceeding client expectations.
- **Skilled in database management and optimization, working with relational (MySQL, PostgreSQL)** ensuring efficient data storage, retrieval, and security.
- **Deep understanding of version control systems (Git), CI/CD pipelines, and modern development methodologies**, ensuring seamless code integration, testing, and deployment processes.
- **Passionate about implementing best practices in code quality, performance optimization, and responsive design**, delivering user-centric applications that enhance user experience across multiple devices and platforms.

CORE COMPETENCIES

Software Development Life Cycle

Cloud Computing Solutions

Microservices Architecture

E-commerce Platforms

Agile Methodologies

User Experience Optimization

Application Performance Tuning

System Integration

Data Management Strategies

Quality Assurance Processes

People Management

Cross-Functional Collaboration

EDUCATION

2018: B.Tech. in Computer Science and Engineering, Orissa Engineering College, Bhubaneswar

WORK EXPERIENCE

Senior Software Engineer at Quest Global (April 2024 - Present)

Software Development Senior Analyst at NTT Data Services (February 2021 - April 2024)

Java Full Stack Developer at Jaza Software OPC Pvt. Ltd. (August 2018 - February 2021)

Responsibilities:

- Leading the design and development of scalable software solutions, ensuring efficient architecture and integration for client-specific needs.
- Collaborating with cross-functional teams to define system requirements, develop new features, and implement system improvements.
- Driving the development of robust and efficient backend services, optimizing performance, and ensuring reliability and scalability.
- Mentoring and guiding junior engineers, conducting code reviews, and promoting best practices in software development.
- Analyzing complex technical problems, troubleshooting, and providing effective solutions to ensure timely delivery.
- Designing and implementing APIs for seamless data exchange between different platforms and systems.
- Collaborating with stakeholders to understand business requirements and translating them into technical specifications and solutions.

PROJECTS UNDERTAKEN

Asset Management (Collins Aerospace) (April 2024 - Present)

- Spearheading the development of an aerospace (MRO) parts management application module to track part status, measure progress, and manage delays using interactive dashboards, pie charts, and Excel export features.
- Designed and implemented key features like "report-sharing feature enabling users to securely share reports within the application via email input, with validation and in-app communication.", "Advance Filters", and "Performance Optimization like Caching, Archiving using Schedulers, Ag-Grid Library, enhancing user experience and collaborative functionalities.
- Leading backend development of REST APIs, overseeing UI components, and contributing to code reviews and complex logic implementation.
- **Technologies:** Java 8, Spring Boot, React, Redux, Ag-Grid, Azure DevOps ,MySQL, CSS, HTML.

Eir.ie (February 2021 - April 2024)

- Played a key role in developing the payment gateway, redesigning the UI, and building the broadband module for a seamless e-commerce experience.
- Drove successful bug fixes and managed production deployment to ensure smooth system performance.
- **Technologies:** Java, Spring Boot, React.js, Node.js, OpenCMS, Docker, APIGEE

Costing (November 2020 - February 2021)

- Modernized the costing process in the apparel industry, facilitating real-time merchant uploads and approval workflows.
- Built and optimized REST APIs, business logic, and the complete UI for end-to-end functionality.
- **Technologies:** Java, Spring Boot, Hibernate, AOP, PostgreSQL, React, Redux, JavaScript, Material UI.

Authentication Server (November 2019 - October 2020)

- Engineered a centralized user authentication and authorization system for various applications.
- Led the UI development and design, ensuring streamlined user access and security protocols.
- **Technologies:** JavaScript, React JS, Material UI.

OptaPlan (November 2018 - October 2019)

- Developed a solution to track client orders and highlight delays, empowering executives to take proactive action.
- Contributed to backend development with REST APIs and business logic, alongside front-end development of the user interface.
- **Technologies:** Java, Spring Boot, Hibernate, AOP, PostgreSQL, React, Redux, JavaScript, Material UI.

ACHIEVEMENTS

- Converted React Application to PWA and saved a lot of cost to the client.
- Developed Software from Scratch.
- Implemented an automated testing framework, decreasing manual testing efforts by 80% and increasing code coverage by 60%, resulting in faster release cycles and fewer post-deployment issues.
- Optimized the back-end logic for a high-traffic application, reducing server load by 50% and enhancing response times, which contributed to a 50% increase in customer satisfaction and retention.
- Revamped the front-end user interface, integrating cutting-edge JavaScript libraries, which led to a 80% improvement in user interaction speed and a 80% boost in overall site engagement.

TECHNICAL SKILLS

- Advanced Java Development
- Spring Framework Suite (Spring Boot, Spring Data JPA, Spring Security), APIGEE
- RESTful API Development
- Front-end Technologies (React.js, Redux, JavaScript, HTML5, CSS3)
- Database Management (PostgreSQL, MySQL)
- Agile Project Management
- Version Control Systems (Git)
- Build Automation Tools (Maven)
- Data Structures and Algorithms
- UI/UX Design Principles

PERSONAL DETAILS

Date of Birth: 27/09/1996

Languages Known: English & Hindi

Address: 2nd cross, Newport House Stanza Living, Opp to Reva University, Yelahanka, Bengaluru 560064
