

SYED SHARMILA

Validation Engineer

Email:sharmila6813@gmail.com

Mobile No: 9652030595

CAREER OBJECTIVE:

A rewarding opportunity in a growth-oriented company, this gives me scope to apply my knowledge and become an active member of a team to work. I am seeking a responsible position to use my diverse skills, experience and advanced technical knowledge to develop innovative solutions.

PROFESSIONAL SUMMARY:

- ❖ EMBEDDED TEST ENGINEER with **4** years of experience in **Automotive Software Verification & Validation**.
- ❖ Experience on Telematics features such as Accident call, Breakdown call, Remote Features.
- ❖ Having Experience in different **HMI Functionalities** like **Bluetooth, USB, Navigation, FM, Valet parking, User profiles**.
- ❖ Strong knowledge of **Apple CarPlay** and **Android Auto**, ensuring **smooth integration in automotive infotainment systems**.
- ❖ Having project experience with **Canoe Tool** with **Trace Window, Graphic Window, Write Window, IG Block, and G Block**.
- ❖ Experience in communication protocols like **CAN and CAN TP** ensuring effective data transmission within automotive systems.
- ❖ Having good experience in programming languages like **CAPL scripting**.
- ❖ Having good working experience in different Ecus like **INFOTAINMENT & Telematics on bench level and Exposer on Vehicle level**.
- ❖ Having experience in all stages of the **SDLC**, from **Requirement Analysis and Design to Implementation, Testing, Deployment, and Maintenance**.
- ❖ Validated on features like **FM** in different ways and it also includes validating of **Seek Up/Down & Auto Seek Up/Down**
- ❖ Skilled in **UDS Protocols** for **transmitting diagnostic data between the diagnostic tool and Ecus, ensuring accurate and reliable data exchange**.
- ❖ Extensive understanding of **Reviewing and Executing Requirement Test Plans and Test cases** by using **Rational Doors**.
- ❖ Using **AVB PANNELS** in place of infotainment & for sending the signals through **CANOE** tool and executing the test cases. Involved in validating the **BORDERS / GUIDELINES, VIEWS, BRIGHTNESS, CONTRASTS, & VIEWS OF Rare View Camera & Multi View Camera**
- ❖ Having experience in **Automation Testing**.
- ❖ Hands on experience on diagnostics service id's 10,11,22,2E,3E,31,27,19,14,85,28.
- ❖ New software's **flashing** when Required While Validating.
- ❖ Experienced in **Harness preparation** for precise **bench-level testing** of automotive components.
- ❖ Having experience in **Automation Testing** in the **HIL Bench setup with V-TAF**.
- ❖ Experience in **creating, prioritizing, and managing issues (bugs, tasks, user stories)** within **ALM** to ensure timely resolution and track progress.
- ❖ Knowledge of Various testing like **Smoke Testing, Functional Testing, Regression Testing, and Stress Testing**
- ❖ Having knowledge in **fault management** to Read DTC information, Read, Write DID, Session control Routine, Clear DTC.
- ❖ Performed testing activities of **HVAC** features normal on infotainment of like **AC ON/OFF, Blower ON/OFF**.
- ❖ Taking of the serial logs by using the **Terra term**.

PROFESSIONAL SUMMARY:

- ❖ System Associate, Infosys(Dec 2021 – Apr 2024)
- ❖ Validation Engineer, Toyota(May 2024 – Till Date)

PROJECT-1:

ENVIRONMENT: BMW MGU-22

ROLES & RESPONSIBILITIES: -

- ❖ Experience in performing comprehensive testing of **infotainment systems**, ensuring their **seamless functionality**.
- ❖ I am proficient in **testing individual infotainment modules** such as **Bluetooth connectivity, USB media sources, Radio functionality, Voice Recognition, and Smartphone Integration (Android Auto and Apple Car Play)**.
- ❖ Conducted rigorous evaluation of **various media sources like USB, AUX, and Bluetooth connectivity, ensuring smooth playback and seamless integration with the infotainment system. Successfully integrated infotainment systems with other in-vehicle components, such as the instrument cluster, steering wheel controls, and climate control, ensuring synchronized operations and optimal user experience.**
- ❖ Using **AVB PANNELS** in place of infotainment & for sending the signals through **CANOE** tool and executing the test cases. Involved in validating the **BORDERS / GUIDELINES, VIEWS, BRIGHTNESS, CONTRASTS, & VIEWS OF Rare View Camera & Multi View Camera.**
- ❖ Utilized **python scripts** to automate repetitive tasks, streamlining workflow and improving productivity
- ❖ Proficient in **handling software updates and configuration changes for infotainment systems**, ensuring the **latest features and bug fixes are seamlessly implemented**
- ❖ Utilized **diagnostic tools to read and clear Diagnostic Trouble Codes (DTCs) and Data Identification (DID)** for efficient troubleshooting and resolution of infotainment-related issues. Performed **smoke tests and functional regressive testing to meet customer deadlines.**
- ❖ Evaluated the performance of **infotainment systems under various conditions, including extreme temperatures and varying power supply, to ensure their reliability and robustness.**
- ❖ Prepared detailed **test plans, test cases, and test reports to document testing activities, results, and defects** for effective communication within the development team.
- ❖ Participated in **hardware testing of components like touchscreens, buttons, and audio amplifiers** to ensure their proper functionality and integration with the infotainment system.
- ❖ **Identify bugs and reporting bugs into the bug tracking system with supporting log files and data using ALM.**
- ❖ Conducted **usability tests with end-users to gather feedback** and insights for further refinement of the infotainment system's features and user interface.
- ❖ Collaborated with multiple teams to **enhance test₂ routines**, ensuring comprehensive **test coverage** and **minimizing postproduction failures for customers.**

- ❖ I have Basic Exposure on Robot framework.
- ❖ Actively contributed to **continuous improvement initiatives**, suggesting process optimizations and best practices to enhance the efficiency and effectiveness of infotainment testing processes.
- ❖ Diagnostics services. **Identifying and raising tickets** for **features** which are not as per the requirements.

PROJECT-2:

ENVIRONMENT: Toyota TY4

ROLES & RESPONSIBILITIES:

- ❖ Validate and review all the **Test cases** based on those **requirements**.
- ❖ Having Experience on domain testing such as **CIA, PIA, HMI, Connectivity, Telematics, Speech**.
- ❖ Worked on infotainment features like testing on **BLUETOOTH, USB, NAVIGATION, FM, ANDROID AUTO, CAR PLAY, VALET PARKING, and VOICE RECOGNISATION (VR)**.
- ❖ Getting involved in different testing **activities, smoke testing, regression testing, functional testing, ad-hoc testing**.
- ❖ Familiar with **v- model** methodologies and has been involved in **validation phase** on **Software development life cycle**.
- ❖ Validated on many Bluetooth functionalities, including the **phone, media, and various connectivity modes**. Bluetooth profiles including **Hands-free, AVRCP, PBAP, A2DP, GAP, SAP, and MAP** have been tested.
- ❖ Testing navigational features including **One-shot Destination, Points of Interest, and History, unpaved and paved roads**.
- ❖ Validating radio (FM) functionality in many ways, including validating **seek up/down** and **auto seek up/down**
- ❖ Testing the user interface while the infotainment system is connected with **Android Auto and Car-play**.
- ❖ Having project experience with **Canoe Tool** with **Trace window, Graphic window, Write window, IG block, and G block**
- ❖ Having experience in programming languages like **CAPL Scripting** for sending automated messages to **can buses**.
- ❖ Attending the **standup calls** with **TECHNICAL LEAD** & reporting day - to - day work.

EDUCATION DETAILS:

- ❖ Completed Bachelor's Degree from Vikrama Simhapuri University in 2021.

PROFESSIONAL SKILLS:

Communication Protocol: **CAN, CAN TP, UDS**

Programing Languages: **CAPL, Python**

Bug tracking tool: **Jira, Artifact life cycle management (ALM)**

Requirements Analysis tool: **Rational doors**

Testing tools: **Canoe, Canalyzer**

Log analyzing tool: **DLT, Putty, Tera Term**

Flashing: **QFill, Tera Term, USB**

LANGUAGES:

❖ **ENGLISH, TELUGU, HINDI**

DECLARATION:

I hereby declare that above mentioned information is correct to the best of my knowledge and belief.
